

## Basic, Translational & Clinical Research Session – Abstract Submission

Hi,

Have you undertaken research in the field of venous thromboembolism (VTE)?

We are delighted to announce that abstract submission is now open for the Basic, Translational and Clinical Research Session at VTE Dublin 2019.

**The deadline for abstracts will be August 1<sup>st</sup> 2019.**

VTE Dublin (<https://www.vtedublin.org/>) is a not for profit annual conference held in Dublin every Autumn. It is organised by a multi-disciplinary group of clinicians passionate about improving VTE care both globally and internationally.

This Basic, Translational and Clinical Research Session will run as part of the parallel sessions on day 1 of the conference (Wed Sep 25<sup>th</sup> 2019) and will be an exciting opportunity for people to bring their research findings from the field of VTE and to present them at an international meeting.

If you would like to submit an abstract, you can do so by sending an email to [VTEdublin@gmail.com](mailto:VTEdublin@gmail.com).

**Abstracts should be no more than 500 words in length.**

We are very much looking forward to receiving your abstracts. Successful candidates will be asked to make a short oral presentation to a group of their peers.

If you have any questions, please contact Karl Ewins at [VTEdublin@gmail.com](mailto:VTEdublin@gmail.com).

Best of luck,

VTE Dublin Team

## Abstract Submission Guidelines

- Abstract submission implies that all authors have read and reviewed the submission.
- Abstract submission deadline date is no later than August 1<sup>st</sup> 2019.
- Abstracts may be withdrawn but not altered after the deadline.
- Whilst reports of individual cases (case reports) with unique scientific or educational value will be considered, they must enhance clinical practice or diagnostic understanding to be accepted. In the interest of maintaining high scientific standards only those abstracts passing peer review will be accepted.
- The abstract should include the following elements:
  - Title: (in block capitals)
  - Introduction/Background: a brief discussion of the background or rationale of the study and/or questions addressed
  - Materials and methods: the experimental approach, materials, and methods used in the study
  - Results: the data and results obtained in the study
  - Conclusions: the conclusions and/or implications of the results.
- The main body of the abstract must not exceed 500 words.
